

LISA OLSSON

Lisa Olsson, the 2021 Jane M. Klausman Scholarship winner from the Zonta Club of Concord, NH has won the District 1 JMK award and we are thrilled!

Her application will now be submitted to ZI for consideration at the international level for one of six of the \$8,000 international scholarships.

Lisa joined the Concord club members at their June Business Meeting. Lisa's home is in Saltsjobaden, Sweden but she lives in Durham, NH while attending the University of New Hampshire's Peter T. Paul College of Business & Economics. Lisa is expected to be awarded her undergraduate degree in Business Administration, Information Systems & Business Analytics in May 2022. Over the last six semesters she has earned a 4.00 GPA. Lisa is a student athlete and competes on the UNH Division 1 Alpine Ski Team and tutors her teammates. Lisa also volunteers at a local church. During the summer of 2021, she interned remotely with Morningstar Inc. headquartered in Chicago, and we have just learned that they have offered her a job when she graduates.

Lisa's short-term goal is to pursue a master's degree in Business Analytics with a career goal to pursue her passion about transparency, gaining insight and information from data, and sustainable financial systems. She has received a number of academic awards including recognition by the National Collegiate Athletic Association (NCAA) Elite 90 for highest GPA.

The Zonta Club of Concord sent her a \$1,000 check to be used toward her educational goals, and in the near future she will receive the \$2,000 District 1 award. And, of course, we are hopeful she will receive recognition and financial support from the Zonta Foundation for Women.

When notified of her District 1 award, Lisa wrote: "I am honored to be awarded the Jane M. Klausman Women in Business Scholarship. Getting recognized by Zonta is extremely motivating and I am excited to keep pushing for your mission of overcoming gender barriers throughout my academic and professional career. This scholarship will help me fulfill my plan of pursuing a master's degree in business analytics and set myself up for an influential career within the financial industry. Thank you again for your support!"

We wish her continued success in school, may she enjoy a very satisfying career, and may life be good to her!
